INFORMATIONS PERSONNELLES

Étudiant en deuxième année de licence en e-business, avec une bonne maîtrise des outils numériques et un intérêt marqué pour le commerce en ligne et les stratégies digitales. Passionné par l'univers de l'innovation numérique, je suis motivé à acquérir davantage de compétences pratiques et à contribuer au développement d'une entreprise tout en continuant à enrichir ma formation académique.

EXPERIENCES PRO ET STAGES

- Membre actif AIESEC département IGV 2021 - 2022
 - (International global volunteer)
 - *organisation d'échange d'étudiants internationaux
 - * accueillir des volontaires internationaux et les aider jusqu'à ce qu'ils soient pleinement intégrés
- barista dans un café local 2020 - 2021
 - Serveur, expert en service personnalisé et rapide, garantissant une expérience client de qualité dans un environnement dynamique.
- Des projet de construction : 2019
 - * solide capacité de résoudre des problèmes de sécurité
 - * Organisation de l'utilisation utile des machines

PARCOURS D'ÉTUDES

- licence en informatique de gestion à l'école supérieur des science économique et commercial de tunis (ESSECT) 2023-2024
 - * E-business
- Bac Informatique Lycée Hammem Nilf 2020
 - * E-business

Objet : Candidature pour un poste dans le domaine de l'informatique et de la gestion

Madame, Monsieur,

Actuellement à la recherche d'une opportunité professionnelle, je souhaite mettre en pratique mes compétences en développement informatique, gestion et communication. Grâce à mes expériences passées, notamment en tant que barista et membre actif d'AIESEC, ainsi qu'à mes connaissances en programmation, je suis convaincu de pouvoir apporter une contribution positive et significative à votre équipe.

Mon passage chez AIESEC m'a permis de développer de solides compétences en gestion de projet, travail d'équipe et communication interculturelle. J'ai appris à résoudre des problèmes de manière créative, à m'adapter à des environnements divers et à collaborer efficacement avec des personnes de cultures variées. Ces expériences m'ont également permis d'améliorer mes compétences organisationnelles et mon sens de l'initiative, des qualités essentielles pour exceller dans le domaine de l'informatique et de la gestion.

De plus, mon intérêt pour les technologies et mon ambition de progresser dans ce domaine me poussent à chercher un poste où je pourrai mettre à profit mes compétences en développement et gestion de projets informatiques, tout en acquérant de nouvelles connaissances pour évoluer professionnellement.

Je suis convaincu que ma capacité à apprendre rapidement et à m'adapter à de nouveaux défis serait un atout pour votre entreprise. Je serais ravi de discuter plus en détail de mes qualifications et de la manière dont je pourrais contribuer à vos projets. Je reste à votre disposition pour un entretien à votre convenance.

Dans l'attente de votre réponse, je vous prie d'agréer, Madame, Monsieur, l'expression de mes salutations distinguées.

About

Majoring in E-business in the University of Tunis, I am looking forward to become a full-stack developer. Meanwhile, I have been working as a freelance web developer and video editor for over a year now. My passion for coding has started since I was a teenager. I have mastered JavaScript, HTML and C++, C#. I strongly believe that I am a fast learner and I am always open to knowledge, new ideas and experiences. Besides, I have excellent writing skills and have managed to w...see more

4. WORKSHOP CHOICE OF THE PPP

- Professional Project: Cybersecurity

As a second-year Business Computing student, I'm working on a professional project focused on cybersecurity. The goal is to evaluate and build on my skills, experiences, and career aspirations in this exciting field. This project is a work in progress and will continue to evolve as I discover new opportunities and learn from real-world challenges. I'm excited to deepen my knowledge of cybersecurity and bridge the gap between what I've learned academically and what's happening in the industry, all while preparing for my future career.

1 - My Qualities

Introduction

I bring a range of qualities that make me well-suited for cybersecurity, including:

- **Attention to Detail and Organization**: I am highly meticulous and organized, which allows me to analyze systems, identify vulnerabilities, and ensure accuracy in every task.

- **Self-Reliance and Problem-Solving:** I am confident in my ability to work independently and tackle challenges. I've demonstrated this through academic projects where I researched and resolved security issues on my own.
- **Adaptability:** With the rapid evolution of cybersecurity, I quickly adapt to new technologies and environments. My studies and experiences have strengthened my ability to stay agile and keep up with emerging trends.
- **Intellectual Curiosity:** I am passionate about continuous learning, always seeking to stay informed about the latest developments in cybersecurity through research and practice.
- **Self-Confidence and Communication:** My experience as an active member of AIESEC has significantly boosted my self-confidence and communication skills. I regularly interacted with diverse teams and clients, which helped me develop the confidence to tackle challenges and engage effectively in different environments.

These qualities enable me to excel in cybersecurity and continue growing as a professional.

2 - My Weaknesses

Introduction

While I have strengths that support my growth in cybersecurity, I also recognize areas where I am working to improve:

- **Perfectionism**: I tend to focus heavily on getting every detail right, which can sometimes slow me down. I am learning to strike a better balance between accuracy and efficiency, ensuring I meet deadlines without compromising quality.
- **Overthinking**: I occasionally overanalyze problems, trying to find the best possible solution. I've been working on trusting my instincts and taking more decisive actions, especially in high-pressure situations where speed is essential.
- **Impatience with Progress**: I sometimes feel frustrated when progress is slower than expected, especially when I am working on complex tasks. However, I am learning to manage my expectations and focus on steady improvement rather than expecting immediate results.

- **Public Speaking:** Although I've gained confidence in communication through AIESEC, I still find public speaking challenging at times. I am actively working on improving this skill by seeking opportunities to practice presenting and engaging with larger audiences.
- **Delegation:** I sometimes struggle to delegate tasks effectively, preferring to handle everything myself. I am learning to trust team collaboration more and share responsibilities to work more efficiently

My Background and Professional Experiences

1 - My Background

- After earning an honors high school diploma in Economics and Management, I enrolled at the School of Economics and Commercial Sciences of Tunis (ESSECT) for a bachelor's degree in Information Systems Management. This training has provided me with a strong foundation in programming, information systems management, and networks, all essential for advancing cybersecurity.

2 - My Experiences

- AIESEC Experience: As an active member of AIESEC, I developed leadership, teamwork, and cross-cultural communication skills. I managed various projects that enhanced my problem-solving abilities and strengthened my ability to work in dynamic, diverse teams.

- **3 - My Career Aspirations**

My goal is to become a cybersecurity expert, specializing in the protection of information systems and the detection of emerging threats. I am eager to contribute to projects focused on securing IT infrastructures, preventing cyberattacks, and helping organizations adopt cybersecurity best practices. Through continuous learning and hands-on experience, I aim to play a key role in safeguarding digital assets and ensuring a proactive approach to security.

- **4 - My Skills and Capabilities**

- **Analyze and secure IT systems using my programming skills in C, Java, HTML, CSS, and JavaScript.**
- **Identify security vulnerabilities and develop customized solutions to address them.**
- **Collaborate effectively within a team to tackle complex cybersecurity challenges.**
- **Quickly adapt to new cybersecurity tools and techniques to stay ahead of evolving threats.**

My Future Vision

In 5 Years:

- *In the next five years, I see myself working as a cybersecurity specialist in a tech-driven company, focusing on securing complex networks and ensuring the protection of digital assets. I hope to develop expertise in areas such as cloud security, network monitoring, and risk management, playing a pivotal role in building proactive security systems. I also aim to earn certifications in ethical hacking and penetration testing to deepen my technical capabilities.*

In 10 Years

- *Ten years from now, I envision myself leading a cybersecurity team or division within a global technology company, where I can design and implement comprehensive security strategies on a larger scale. I also aspire to become a thought leader in cybersecurity, providing expert guidance on emerging threats and contributing to the development of new industry standards. My goal is to make significant advancements in securing critical infrastructures and driving innovation in cybersecurity practices.*

My Professional Project

1 - Careers That Inspire Me

I am highly interested in pursuing a career in the following roles within the cybersecurity field:

- **Cybersecurity Analyst: Monitoring and defending systems from cyber threats and intrusions.**
- **Cloud Security Architect: Designing and implementing secure cloud infrastructures for organizations.**
- **Incident Response Specialist: Leading investigations and response efforts to cyberattacks and breaches.**
-
- **Risk Management Consultant: Advising organizations on identifying, assessing, and mitigating security risks.**

2 - Connecting with Industry Professionals

- To gain deeper insights into the cybersecurity sector, I actively engage in seminars, webinars, and industry conferences. These events have provided me with a clearer understanding of the industry's needs and challenges. I have been able to network with experienced professionals, learn about emerging threats, and identify critical skills such as security protocol design, threat hunting, and risk mitigation. By staying involved in these discussions, I continuously expand my knowledge and refine my approach to solving real-world cybersecurity problems.

Conclusion

Reflecting on my strengths and weaknesses has provided me with greater clarity on my professional aspirations. This project helped me answer three key questions:

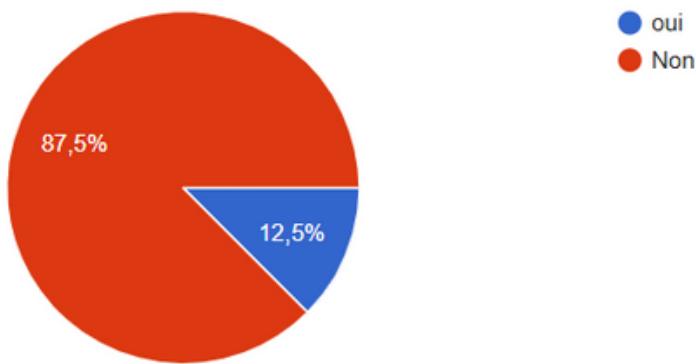

- **What do I want to do?** I want to specialize in cybersecurity, focusing on securing IT infrastructures and protecting sensitive data from cyber threats.
-
- **What do I know how to do?** My training in Information Systems Management has equipped me with skills in network security, data protection, and programming.
- **What am I capable of?** I am capable of identifying vulnerabilities, analyzing risks, and offering tailored solutions to ensure optimal system protection.

This reflection has solidified my goal of pursuing a career in cybersecurity, where I can help organizations safeguard their digital assets and defend against cyberattacks.
